Education

Indiana University, Bloomington, IN

May 2026

Luddy School of Informatics, Computing, and Engineering

GPA: 3.7 / 4.0

Bachelor of Science in Computer Science

Specialization: Software Engineering

Minor: Business

Study Abroad: College Year in Athens (CYA)

Relevant Coursework: Machine Learning, Applied Algorithms, Database Concepts, Object-Oriented Software Methods, Software Systems, Data Structures, Artificial Intelligence, Distributed Systems, Mobile App Development.

Honors: Hutton Honors College, Hudson & Holland, Provost, The National Society of Collegiate Scholars.

Technical Skills

- **Languages:** Java, Python, JavaScript, C, SQL, C#, PHP, Swift, HTML/CSS
- **Frameworks/Libraries:** React.js, Node.js, Express.js, Spring Boot, Chart.js
- **DevOps & Tools:** Docker, Kubernetes, Minikube, Linux (Ubuntu), Vagrant, VMWare, Git, Azure, PostgreSQL
- **Concepts:** RESTful APIs, Agile/Scrum, Object-Oriented Programming (OOP), Data Structures & Algorithms

Work Experience

DMC Insurance | Fishers, IN

May 2025 - Present

IT Intern

- Transitioned to a remote developer role following a successful internship; sole intern (out of seven) retained for continued collaboration while completing degree.
- Operated within an Agile development lifecycle, participating in stand-ups and frequently pivoting development priorities to adjust to changing business needs.
- Conducted live technical demonstrations and progress presentations for department managers and executives to gather stakeholder feedback and ensure product alignment.
- Collaborated with the IT team to integrate the "Daily Update Portal" into the existing company infrastructure, ensuring compliance with internal security standards.

Projects

Daily Update Portal | PHP, SQL, JavaScript, HTML/CSS

Summer 2025

- Engineered a full-stack, AI-powered enterprise application currently being integrated for 120+ employees to automate daily task reporting and performance analysis.
- Integrated OpenAI API to process data, generating automated productivity scores and weekly task summaries.
- Developed a secure authentication system, automated email notifications, and an analytics dashboard for real-time trend analysis and team comparison.

ClashPro AI | React, Node.js, Express, Clash Royale API

February 2025

- Architected a full-stack dashboard that fetches real-time data via the Clash Royale API to visualize statistics.
- Developed an algorithm to feed processed data into an AI API to generate personalized strategy tips for users.
- Deployed and hosted the application, integrating advertisements to generate revenue and offset API usage costs.
